TAPMI AI CONCLAVE 2026

Enterprise AI: From Experimentation
To Scaled Value Creation

Saturday, 24th October 2026
TAPMI Campus, Manipal

ABOUT THE CONCLAVE

Under the theme Enterprise AI: From Experimentation to Scaled Value Creation, the TAPMI AI Conclave 2026 brings together industry leaders, technology practitioners, and researchers to tackle the biggest challenge in enterprise AI: moving from fragmented experiments to enterprise-wide, measurable value. Over the past few years, enterprises across industries have rushed to experiment with Artificial Intelligence, piloting chatbots, automating workflows, and exploring GenAI use cases with genuine enthusiasm. Experimentation has been essential: it has allowed organisations to learn fast, fail cheaply, and build internal confidence in AI's potential. But a critical question now confronts leadership teams: how do these scattered pilots translate into sustained, enterprise-wide business value?

This is the central challenge our conclave seeks to address. Scaling AI is fundamentally different from piloting it. It demands robust data infrastructure, organizational readiness, governance frameworks, and, most importantly, a workforce and leadership equipped to manage AI responsibly and strategically. Our agenda is designed to unpack this journey in stages.

AGENDA AT A GLANCE

Keynote 1: From AI Pilots to Enterprise Value — The Next Phase of AI Transformation
Panel Discussion 1: GenAI in Enterprise — Hype, Reality & the Road to Business Impact
Keynote 2: Building AI-Ready Organizations
Panel Discussion 2: Responsible AI at Scale — Governance, Risk, Ethics & Trust
Enterprise AI Use Case Showcase

We also invite applications from industry to showcase their Enterprise AI products. Selected products would be allowed to set up a kiosk at the TAPMI Campus.
